Re: WT Docket No. 01-309
Ex Parte Presentation

Dear Mr. Hurst:

On behalf of the Alliance for Telecommunications Industry Solutions' Incubator Solutions Program #4 – Hearing Aid Compatibility (AISP.4-HAC), attached herewith are the results of AISP.4-HAC's CDMA vocoder testing. As discussed previously, this testing was requested by the FCC's Office of Engineering and Technology.

In the vocoder testing, each manufacturer tested its own CDMA products. The data does not correlate between labs, but can be used to compare the radio configurations and service options from each lab. The first sheet in the spreadsheet, "scan results," shows the waveforms from each test of radio configurations (RC) and service options (SO). (The scales are different between labs and should not be compared between labs.) The second sheet, "parameters," lists the test details. The final sheet, "results," shows the raw numbers from the assessment systems.

A copy of this letter and attachment are being submitted for inclusion in the above-referenced docket. If you have any questions regarding this matter, please do not hesitate to contact the undersigned.

Sincerely,

Thomas Goode
General Counsel
