

**SIGNALING NETWORK SYSTEMS
COMMITTEE TECHNICAL PAPER**

**John W. Seazholtz
Vice President -
Technology and Information Services
Bell Atlantic
1310 North Court House Road, 11th Floor
Arlington, VA 22201
(703) 974-3652**

CONTENTS

1.	Executive Summary.....	1
2.	Background.....	2
2.1	Common Channel Signaling.....	2
2.2	Network Reliability Council.....	3
2.3	Signaling Network Systems Committee.....	3
2.4	Organization of Technical Paper.....	4
3.	Team Members.....	4
4.	SNS Team Data Collection Process.....	5
4.1	Immediately Available Data.....	5
4.2	Industry Data.....	6
4.3	FCC Major Outage Data.....	7
5.	Signaling Network Systems Data Analysis Results.....	7
5.1	Analysis of Immediately Available Bellcore Data.....	7
5.1.1	Network Failure Modes of CCS Service Affecting Outages.....	8
5.1.2	STP Reliability and Outage Causes.....	9
5.1.3	Recommendations.....	10
5.2	Analysis of Industry Data.....	10
5.2.1	SNS Data Team & Analysis Process.....	10
5.2.2	Network Failure Modes of CCS Service Affecting Outages.....	11
5.2.3	Link Related Failure Analysis and Causes.....	12
5.2.3.1	Link Recommendations.....	12
5.2.4	SP/SSP Outage Analysis.....	13
5.2.4.1	SP/SSP Downtime and Trend.....	13
5.2.4.2	SP/SSP Causes of Downtime.....	14
5.2.4.3	Analysis of Procedural Errors.....	14
5.2.4.4	Analysis of Software Caused Outages.....	16
5.2.4.5	SP/SSP Recommendations.....	17
5.2.5	STP Failure Analysis.....	18
5.2.5.1	STP Downtime and Trend.....	18
5.2.5.2	STP Failure Causes.....	19
5.2.5.3	Procedural Errors and STP Growth.....	19
5.2.5.4	STP Recommendations.....	20
5.2.6	SCP Failure Analysis.....	21
5.2.6.1	Causes of Failures.....	22
5.2.6.2	SCP Power Recommendations.....	23
5.2.6.3	Other Causes.....	23
5.2.6.4	SCP Summary.....	23

5.2.7	FCC Docket 91-273 Signaling Related Outage Events.....	23
5.2.7.1	Summary of Data.....	23
5.2.7.1.1	Recommendations.....	24
5.2.8	Recommendations to Prevent Long Duration Events.....	25
5.2.9	Additional Observations.....	26
5.2.9.1	Quality of Root Cause Analyses.....	26
5.2.9.2	Outage Information Sharing.....	26
5.2.9.3	Recommendations.....	27
6.	Key Learnings, Recommended Best Practices and status of response to 1991 CCS Network Outages.....	27
6.1	Key Learnings.....	27
6.1.1	Need for better Root Cause Analysis.....	27
6.1.1.1	Recommended Generic Process.....	28
6.1.1.2	Industry Best Practices.....	31
6.1.2	Outage Information Sharing.....	32
6.1.2.1	Service Provider's Responsibilities.....	33
6.1.2.2	Vendor/Manufacturer's Responsibilities.....	33
6.2	Recommended Best Practices.....	34
6.2.1	Compendium of Best Practices on Maintaining Diversity.....	34
6.2.1.1	TA-TSV-000905, "Common Channel Signaling (CCS) Network interface Specification", Issue 3, December 1992.....	34
6.2.1.2	Network Operations Forum (NOF) Reference Document Section III SS7 Link & Trunk, Issue 3, April 1993.....	34
6.2.1.3	S.E. Makris, "Digital Cross-Connect Systems and CCS Survivability," IEEE International Communications (ICC'93), May 23-26, 1993 Geneva, Switzerland.....	34
6.2.1.4	Trunk Integrated Records Keeping System (TIRKS).....	35
6.2.1.5	CCS Signaling Link Element Diversity (Checklist).....	35
6.2.1.6	Diversity Requirements for CCS7 Network Interconnect.....	36
6.2.1.7	Stickers on SS7 equipment.....	36
6.2.1.8	U S WEST Restructuring Plan.....	36
6.2.1.9	Example of a Planning and Provisioning Process for CCS Link Diversity.....	37
6.2.2	Crisis Management Exercises.....	38
6.2.3	Prevention of Mated STP Outages.....	38
6.2.4	Emergency Response Plan.....	39
6.3	1991 CCS Network Outages - status of on-going efforts.....	40
6.3.1	SS7 Network Architecture Evaluations and Protocol Enhancements.....	40
6.3.2	General Network Survivability Issues (T1A1.2).....	42
6.3.3	Internetwork Interoperability Test Plan.....	43
7.	Metrics to measure effectiveness of solutions.....	44
7.1	Network Reliability Performance Monitoring.....	44
7.2	Measure Scope, Duration & Impact of an Outage.....	45

8.	-Path Forward.....	45
	8.1 Network Architecture Evaluation - T1S1.3.....	45
	8.2 General Network Survivability Issues - T1A1.2.....	45
	8.3 Internetwork Interoperability Test Plan.....	45
9.	Conclusion.....	46
10.	Acknowledgements.....	52
11.	References.....	52
12.	Appendix.....	53
