

POWER FOCUS TEAM ANALYSIS

**Donald W. Jones
Vice President -
Network Strategic Planning and Support
BellSouth
3535 Colonnade Parkway
Room South E9A1
Birmingham, AL 35243
(205) 977-2943**

CONTENTS

1. Executive Summary.....	1
2. Background.....	3
3. Team Membership.....	3
4. Data Collection and Analysis Methodology.....	3
4.1 Development of the Questionnaire.....	3
4.2 Compilation of Industry.....	3
4.3 Analysis of Industry Power Outage Data.....	4
4.4 Identification of Root Causes of Outages and Industry Best Practices.....	4
5. Types and Causes of Failures.....	4
5.1 Introduction.....	4
5.2 Failure Analysis	5
5.3 Root Cause Analysis	6
6. Key Learnings and Recommended Best Practices.....	8
6.1 Commercial and Power/Electrical Utility Issues.....	9
6.1.1 Introduction.....	9
6.1.2 Generating Capacity Reliability.....	10
6.1.3 Transmission Reliability	10
6.1.4 Distribution Reliability.....	10
6.1.5 Response to Adverse System Situations.....	10
6.1.6 Electric Service Priority (ESP) Restoration	11
6.1.7 Uninterruptible Power Contracts Between Electric Utilities and Industrial Customers.....	12
6.1.8 National Power Laboratories Study.....	13
6.1.9 Key Learnings and Recommended Best Practices.....	13
6.2 Standby Generators.....	14
6.2.1 Types and Causes of Failures.....	15
6.2.2 Key Learnings and Recommended Best Practices.....	15
6.3 Building AC Systems.....	15
6.3.1 Key Learnings and Recommended Best Practices.....	16
6.4 DC Plants.....	16
6.4.1 Key Learnings and Recommended Best Practices.....	17

6.5	DC Distribution Systems.....	18
6.5.1	Primary Distribution.....	19
6.5.2	Secondary Distribution.....	19
6.5.3	Overcurrent Protection.....	19
6.5.3.1	Fuses.....	19
6.5.3.2	Breakers.....	20
6.5.3.3	Comparison of Devices.....	20
6.5.4	Analysis.....	21
6.5.5	Key Learnings and Recommended Best Practices.....	21
6.6	Alarms and Remote Monitoring.....	22
6.6.1	Alarm Discussion.....	22
6.6.2	Remote Power Monitor Discussion.....	22
6.6.3	Key Learnings and Recommended Best Practices.....	23
6.7	Operations and Maintenance.....	24
6.7.1	Key Learnings and Recommended Best Practices.....	25
6.8	Installation/Removal Work.....	25
6.8.1	Types and Causes of Failures.....	26
6.8.2	Key Learnings and Recommended Best Practices.....	26
6.9	Local Power Failure Procedures and Contingency Plans.....	26
6.10	Operational and Engineering Reviews--Continuous Improvement.....	27
6.11	New Technology and Architecture.....	27
6.11.1	Emerging Battery Technologies.....	27
6.11.2	Valve Regulated Lead Acid (VRLA) - Prediction of Battery Capacity.....	28
6.12	Standards.....	29
6.12.1	Valve Regulated Lead Acid (VRLA) Batteries for the Telecommunications Equipment.....	29
6.12.2	Voltage Levels for DC Powered Equipment Used in the Telecommunications Environment.....	29
6.13	Hurricane Andrew Lessons.....	29
6.13.1	Central Offices.....	29
6.13.2	Digital Loop Carrier.....	30
7.	Metrics.....	31
8.	Path Forward.....	31

9. Conclusions.....	32
10. Acknowledgements.....	33
11. Exhibits.....	33
Exhibit 1 Power Checklist.....	32
Exhibit 2 Ask Yourself Program.....	43
12. Appendix.....	43
12.1 Network Reliability Council Issue Statement.....	43
12.2 Questionnaire.....	45
12.3 Preparation of Site Specific Procedures.....	45
12.4 Network Reliability Industry Initiatives.....	47
REFERENCES.....	46
