Mr. Thomas Goode  
ATIS General Counsel  
1200 G Street, NW, Suite 500  
Washington, DC 20005

**Subject: Patent Disclosure and Licensing Statement relating to IP-NNI**

Dear Mr. Goode,

We would like to advise you that NetNumber, Inc.'s participant in the joint ATIS/SIP-Forum IP-NNI working group, Douglas Ranalli, has personal knowledge of two NetNumber patents (6,748,057 and 6,539,077) that he believes may be essential for the implementation of address resolution services being considered by the IP-NNI working group.

Please note that NetNumber has not conducted, and is not currently planning to conduct, a search of its patent portfolio in connection with this disclosure. This disclosure is being made based on the personal knowledge of the participant only.

In addition, we wish to assure you that, to the extent that such patents are indeed essential to the implementation of any ATIS/ANSI standards, NetNumber is prepared to license to any applicant, to the extent that NetNumber has the right to do so and on the basis of reciprocity (grantback), an irrevocable license to such essential patents on reasonable, nondiscriminatory terms and conditions for the purpose of implementation of the standard(s).

If you have any questions, please me at your convenience.

Regards,

Ken Theriault  
VP Finance & Administration  
NetNumber, Inc.
