Re: Patent statement to ATIS for T1LB 471, Draft Proposed  
Technical Report on Algorithms for Load Coil Detection on  
Metallic Pairs Assigned to Digital Subscriber Lines

Northern Telecom will license its patented intellectual property that is required for the implementation of the load coil detection algorithm, as described in the above Technical Report, under terms and conditions that comply with the American National Standards Institute (ANSI) requirements.

Very Truly Yours,

Myron Allen  
Sr. Manager  
Network Standards

**NOTE - The user's attention is called to the possibility that implementation of this Technical Report may require use of an invention covered by patent rights.**

**By publication of this Technical Report, no position is taken with respect to the validity of this claim or of any patent rights in conjunction therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the publisher.**
