MAR - 5 2003

FEDERAL COMMUNICATIONS COMMISSION OFFICE Of THE SECRETARY

He: ATIS/ESIF *Ex Parte* Communication in CC Docket No. 94-102 (Non-Service-Initialized-l'hones Order) Clarification to ATIS/ESIF February 24. 2003 *Ex Parte* Letter

Dear Mr. Muleta:

The purpose of this communication is lo provide the Federal Communications Commission ("FCC" or "Commission") with further clarifying information regarding the *Ex Parte* correspondence dated February 24. 2003 tiled by the Emergency Services Interconnection Forum (ESIF) in the matter referenced above (the "Letter"). Specifically, the ESIF is providing the clarification below in the context of the second to the last paragraph of the Letter regarding the implementation of the ESIF recommended technical solution, J-STD-036, Annex C.¹

The ESIF would like to sensitize the Commission to the fact that the implementation of the Annex C solution, while determined to be the best available technical solution to the non-service-initialized handset prohlem, is more complex and far reaching than the implementation of the Commission's proposed sequential number code. Accordingly, the ESIF encourages the Commission to address *the* implementation aspect further thrntigh the appropriate processes with the affected public safety entities and service providers before establishing mandated compliance with Annex C. The ESIF -- public safety interests, service providers and manufacturers alike --- understands the importance of a timely solution to the non-service-initialized phone problem and, for that reason, stands ready to address the implementation of the Annex C solution iii an expeditious manner. The ESIF has encouraged its members to contact the Commission with information relevant to the implementation issue. And, to tlic extent possible given the nature of the ESIF as an industry technical body, the ESIF itself will provide the Commission with information.

Should you have any further questions regarding the original letter or this clarification. please contact the ATIS General Counsel, Megan Campbell, at

¹I-VU-036, "Enhanced Wireless 9-1-1 Phase 2." August 2000 (published as a joint standard by the felecommunications industry Association ("TIA") on behalf of Committee TR-45 and ATIS, on behalf of Committee T1).
